Surgical treatment of ear-nose-throat diseases

We treat all major ear-nose-throat diseases:

- benign and malignant tumours,
- ear diseases and acute mastoiditis,
- middle ear infection and acute mastoiditis,
- circulatory system diseases,
- surgical treatment of the respiratory system and acute respiratory tract diseases,
- tonsils,
- adenoids,
- gastrointestinal diseases,
- musculoskeletal and connective tissue diseases,
- congenital malformation, deformations,
- eye, ear and neck anomalies, injuries, intoxication,
- skull and facial bone fractures,
- removal of foreign bodies.

The decision on the need for surgical treatment is made by the attending physician.
