Outpatient appointment with an oncologist

This is a service in which an oncologist diagnoses, treats, monitors and consults patients with a malignant tumour.

The oncologist mainly arranges systematic treatment of the tumour using chemotherapy or combinations with other medication groups: targeted therapy, hormone therapy, immunotherapy.

A referral from your family physician or specialist physician is needed to book an appointment. You can also get a <u>paid examination</u> without a referral and with a shorter waiting time.

Appointments can be booked:

- Health Portal https://www.terviseportaal.ee/en/
- by phone 666 1900 Mon-Fri 7:15-18:00
- · at the reception

Read more about coming for a medical specialist appointment.

Oncologists see patients at the Magdaleena unit of the East Tallinn Central Hospital, Kurssaare Hospital and Järvamaa Hospital. Rohkem infot vähiravi kohta meie haiglas loe <u>vähiravilehelt.</u>
