Wound care nurse's appointment

Patients who need wound care (surgical wounds, different ulcers, etc.) and their loved ones are welcome at the wound care nurse's appointment.

At the wound care nurse's appointment:

- we will assess and perform wound care for surgical and traumatic wounds;
- advise and teach the patient and/or their loved ones to cope with chronic ulcers;
- talk about wound care and the special features of hygiene at home;
- recommend suitable wound care products and instruct their use.
