Appointment with a dermatovenerologist

A dermatovenerologist, i.e. a physician of the skin, deals with diagnosing, treatment and monitoring of different skin disorders and sexually transmitted diseases.

We perform different dermatological procedures for the purpose of diagnosis and treatment: various minor surgeries (removal of skin formations), skin biopsies, cryotherapy, i.e. cold therapy, diathermocoagulations for the removal of haemangiomas.

In order to refer a patient to a consultation with a dermatovenerologist, one's family physician or medical specialist will prepare an **e-consultation referral, to which we will respond within 4 working days**(we will contact you and agree on an appointment date).
