Patient transport

If your treatment in hospital has finished and you (or your relative) need a wheelchair or stretcher transport to return to your home or residence, there are several paid options available to organise transportation. East Tallinn Central Hospital itself does not provide transportation services.

Transportation service providers:

Tallinn Emergency Medical Service (TEMS) offers ordered transportation on working days 09:00-17:00. Phone: (+372) 697 1145

Kaljo Kaasik, self-employed driver offers wheelchair or stretcher transportation service during the daytime. Phone: (+372) 5635 3386, kaljo.kaasik [at] mail.ee

Medservice OÜ offers 24-hour wheelchair or stretcher transportation services. Phone: (+372) 5684 3333, info [at] medservice.ee

If you book transportation, please inform the service provider of the following aspects:

- the patient's weight
- the required method of transport: wheelchair or stretcher
- the need for supplemental oxygen administration
- the exact route of transport, transportation time, including which floor, etc.
