Centre of Spinal Surgery

The aim of the Centre of Spinal Surgery is to ensure high-quality treatment for patients with diseases of the spine. We are the only centre in Estonia that brings together the treatment of all spinal pathologies into one department. Both children and adults can turn to us for help. We deal with the treatment of various spinal curvature disorders, such as spondylolisthesis, lumbar radiculitis and discitis, i.e. inflammation of the spine. In addition, we treat various spinal injuries. Our team works in cooperation with neurologists, pain management doctors, rehabilitation doctors, radiologists and other specialists in search of the best solutions for our patients..
