Urologist’s appointment

A urologist is involved in the diagnosis of congenital abnormalities of the urogenital system, acquired diseases, including tumors and injuries, as well as their medical and surgical treatment.

A referral from a family doctor or specialist is required to make an appointment!

A family doctor or specialist can also consult with a urologist via e-consultation. We will respond to the e-consultation within four working days. If the e-consultation determines that the patient needs a specialist appointment, we will contact the patient directly to arrange an appointment time.

Appointments can be booked:

- Health Portal https://www.terviseportaal.ee/en/
- by phone 666 1900 **Mon-Fri 7:30-18:00**
- at the reception

Read more about coming for a medical specialist appointment.
