Spinal surgeon's appointment

A spine surgeon is a specialist focused on diagnosing, monitoring, and surgically treating spinal disorders in both adults and children.

Appointments with a spine surgeon are arranged via **e-consultation** submitted by a family physician or specialist. The e-consultation will be answered within **four working days**.

If the e-consultation indicates that an in-person appointment is necessary, we will contact the patient directly to arrange the visit.

Spine surgeon appointments take place in **Building D of the Magdaleena Unit** — location information can be found here.
