Nursing Care Clinic

At the nursing care clinic, we help to improve the patient's ability to cope with a serious illness or after trauma. Competent, highly experienced doctors, nurse and caregivers work in all departments.

Occupational therapy helps to make hospital days more active.

To ensure the continuity of treatment, we also offer home nursing services to patients who have left the hospital when necessary.

The clinic also has a hospice department. A pastor provides support for patients in terminally ill conditions and/or their loved ones.

Read more about the organisation of services at nursing clinic.
