

Rehabilitation physician's appointment

A rehabilitation physician is a medical specialist who evaluates the patient's condition, decides on the need for medical rehabilitation and prescribes further treatment depending on the patient's problem, by referring the patient to rehabilitative services (physiotherapy, occupational therapy, massage, etc.).

The rehabilitation physician appointments are held at the Magdaleena and Ravi units. A referral from a family doctor or a specialist is necessary for an appointment. If you wish to receive an appointment without referral, we also offer paid visits to a rehabilitation physician.
