Leg load distribution complex examination

We carry out an examination with a sensor board for children weighing 35 kg or more. We counsel smaller children if necessary without performing the examination.

After the examination, the doctor counsels the patient on leg exercises, aids related to foot deformities, orthoses and the selection of appropriate footwear.

When coming to the examination, please bring closed shoes that you used the most, previous orthotics or existing aids related to the feet.

The service is for a fee. Referral is not necessary.

Duration: 45-60 minutes.

Appointments can be booked:

- by phone 666 1900 **Mon-Fri 7:30-18:00**
- at the reception
