Centre of Gynaecology old

The Centre of Gynaecology helps women of all ages. In addition to regular gynaecologist appointments, we also offer consultations in the field of oncological gynaecology and urinary incontinence problems. We consult young patients up to 26 years of age at our youth office. Our main goal is a patient-friendly and caring approach.

We use state-of-the-art technology and contemporary treatment methods in our work. We perform minor surgeries, studies and procedures in our Department of Gynaecology and Outpatient Care. Outpatient surgery patients do not have to spend the night in the hospital and can go home in the evening following the treatment.

We consult you at the Office of Gynaecological Endocrinology in cooperation with the endocrinologists of the Clinic of Internal Medicine.
